Rethinking Cloud for a Future-ready Enterprise

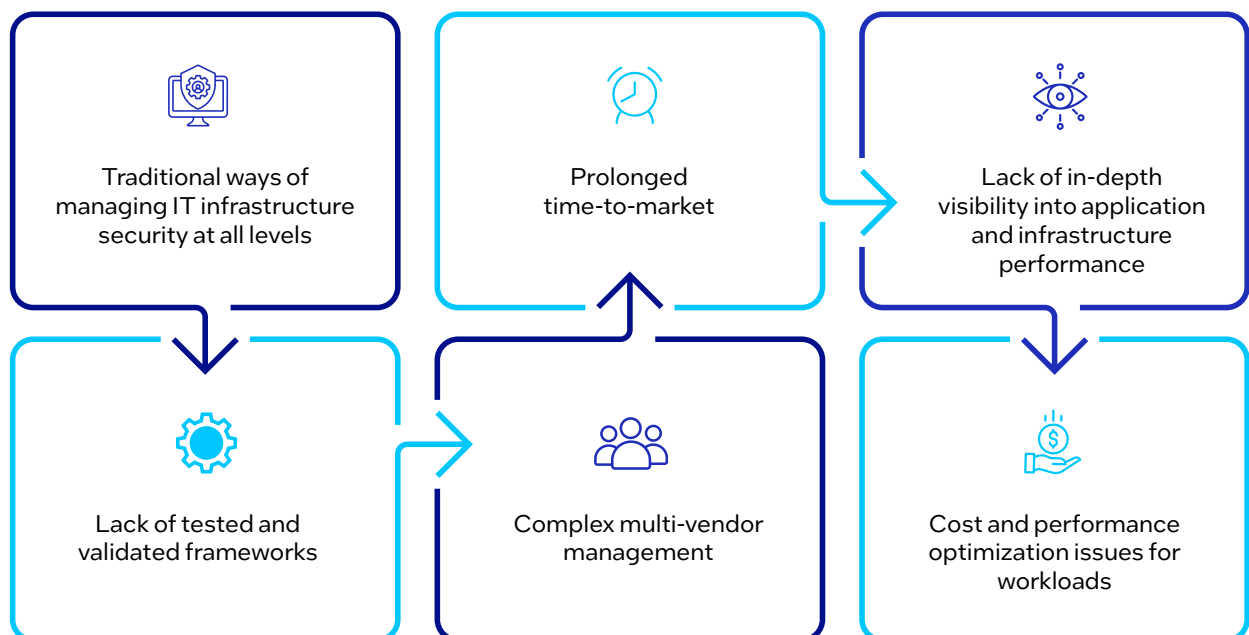

Enable hybrid/multi-cloud
transformations with
VelocITy

Hybrid/multi-cloud adoption: Accelerating digitalization

The pace of IT infrastructure transformation to a hybrid/multi-cloud ecosystem continues to accelerate. Yet, many organizations lack a well-defined roadmap that is critical for a seamless transition to an agile and flexible infrastructure.

Key challenges to hybrid/multi-cloud transformations

Emerging market trend

90%

of enterprises will be relying on a hybrid cloud solution model that includes on-premises, dedicated private clouds, multiple public clouds and legacy platforms by 2022.

Accelerate hybrid/multi-cloud transformation with VelocITy

Built on HCLTech's CloudSMART approach, VelocITy is a multi-cloud offering based on certified reference architecture, integrated with Intel's real-time continuous workload optimization solution Granulate.

VelocITy is driven by intelligent automation and a powerful partner ecosystem to address specific business objectives, providing end-to-end delivery of hybrid/multi-cloud services. It allows enterprises to automate their digital infrastructure components and accelerate their transformation journeys with a constant focus on meeting organizational sustainability goals. Intel's Granulate solution provides sustainability via optimized workloads that can effortlessly improve server throughput and reduce application latency and compute costs with zero code changes. Granulate improves application performance and cuts costs by up to 45% - with no code changes involved.

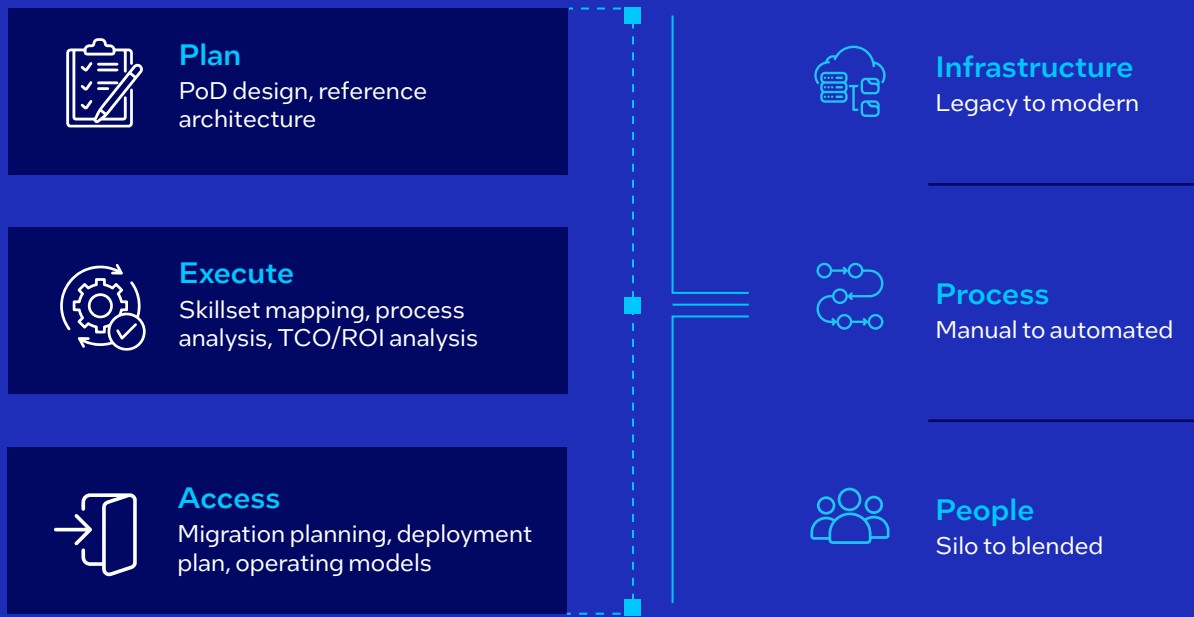

OPTIMIZATIONS

Resource scheduling

I/O, Network, Scheduling, Memory, Disk

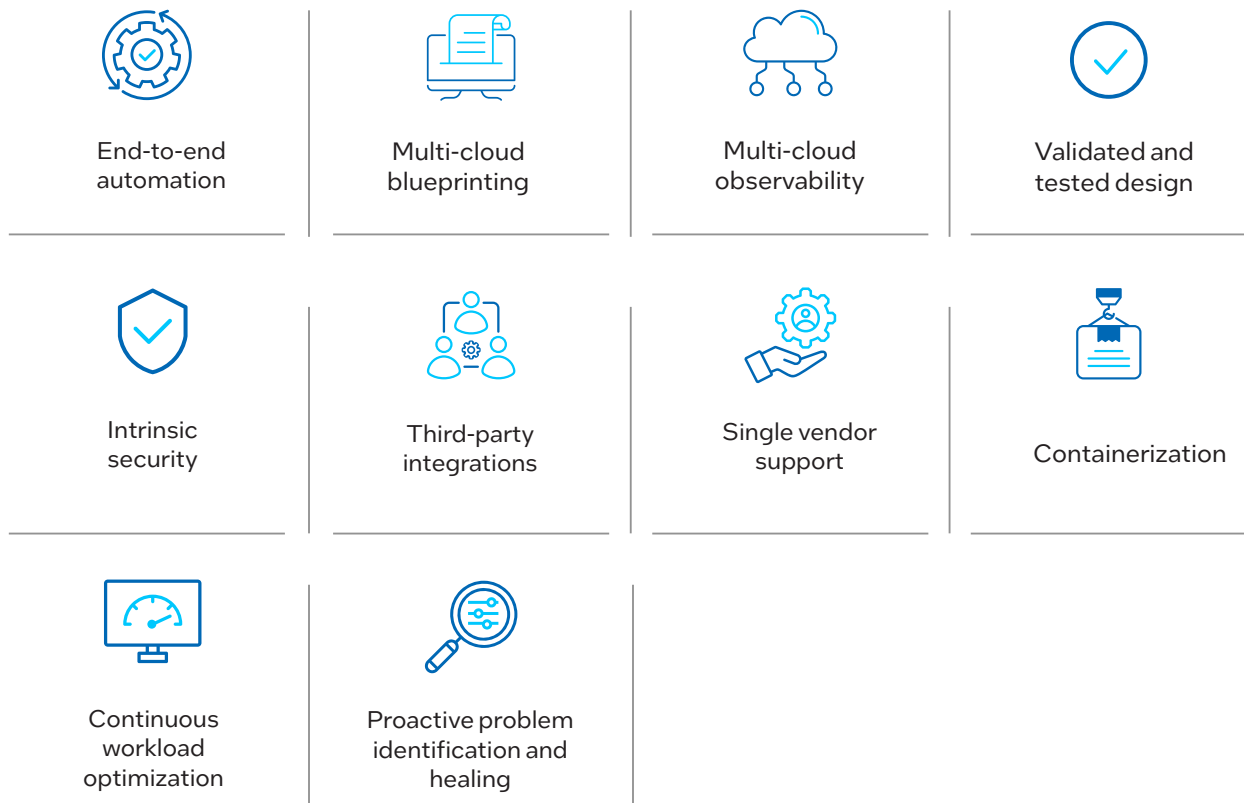

HCLTech's VelocTY framework

Delivering business value

VelocTY offers unique solutions, assets and accelerators to simplify the enterprise digital transformation journey, such as:

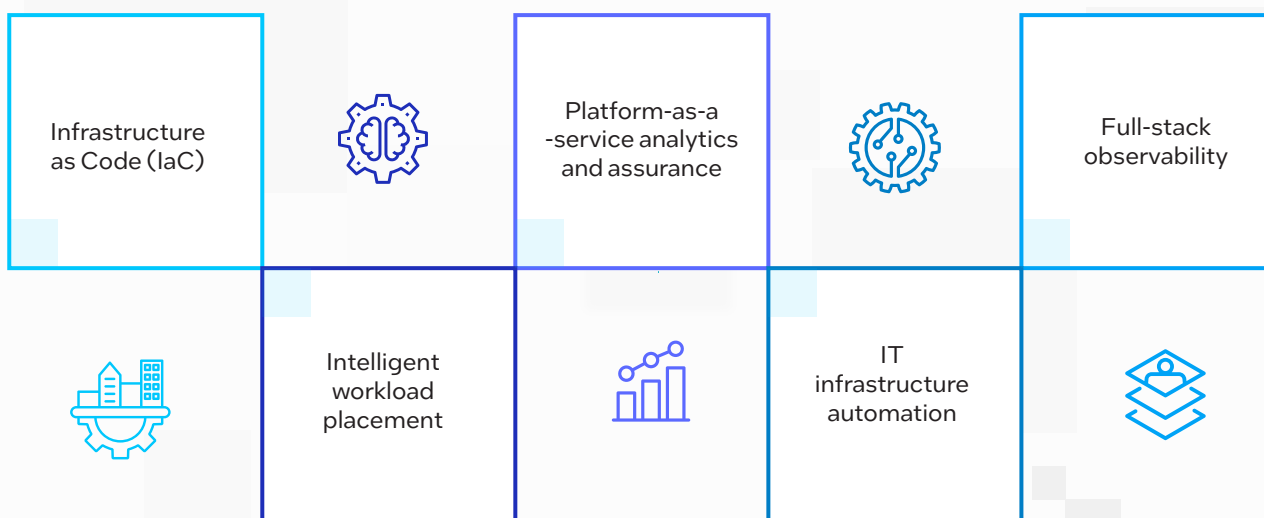

Business benefits with VelocITy

- Lowers deployment timelines up to 15%*
- Improves business agility as a result of faster time-to-market
- Increases automation by up to 40% and workload performances by up to 40%*
- Integrates easily with other IPs, backed by HCL software's DRYiCE framework
- Compliant with SOC2/ GDPR/HIPAA regulations
- Single vendor contact for support on day-to-day issues
- Reduces infrastructure costs with utility constructs available as pay-per-use

Prominent use cases

VelocITy offers innovative solutions powered by industry's leading OEMs and public cloud providers.

* Varies on types of workloads and infra environment

Why HCLTech?

Range of solutions and offerings covering Intel and Cisco's broader partnership ecosystem

HCLTech is a certified Titanium Partner, Intel's highest partnership tier

CMSP "Masters for ITSP Partners" recognition enhances our credibility for Cisco products

Strategic 360-degree partnership with Intel for 20+ years

400+ Intel certified engineers

40+ validated and highly sought after use cases with 9+ tested partner integrations

Multi-cloud framework based on HCLTech's CloudSMART

Leader in all analyst reports for cloud (Gartner, IDC, Everest Group, ISG, Avasant)
